SUMMARY

Highly skilled Web Developer and DevOps Engineer with experience developing and maintaining high-traffic websites for major brands. Spearheaded the DevOps function, creating a standardized infrastructure using AWS and Terraform, while modernizing older systems to improve efficiency and scalability.

PROFESSIONAL EXPERIENCE

MARKETING RESOURCES INC. - Remote
Web Developer / DevOps Engineer

March 2023 - Present

Developed multiple websites and APIs designed to support millions of users for major brands and celebrities, including Apple Music, Bad Bunny, LifeWtr, LeBron James, Rold Gold, Cap'n Crunch, Coachella, and more.

Promoted to establish a new DevOps standard by leveraging AWS, Terraform, and CI/CD pipelines to automate deployments, standardize infrastructure, and enhance efficiency and scalability across environments.

Led a complete overhaul of the company's decade-old systems, modernizing infrastructure and workflows to align with current industry best practices.

CODE THE DREAM - Remote
Volunteer Mentor / Assignment Reviewer

January 2023 - March 2023

Mentored a diverse group of aspiring software developers, providing personalized guidance and technical support to improve their coding skills and job readiness.

Reviewed and provided constructive feedback on students' coding assignments to help them meet industry standards and deepen their understanding of key concepts.
